

# DOĞUŞ YAMAN

## JUNIOR FRONTEND DEVELOPER

### ABOUT ME

+90 531 761 73 25 · [yamandogus251@gmail.com](mailto:yamandogus251@gmail.com) · [Linkedin](#) · [Github](#) · [Bursa/Türkiye](#)

With a background in Health Management and experience in software and telecommunications, I bring a unique perspective and deep understanding of user behavior. I received Front-End development training at OnlyJS Academy, where I am continuously expanding my knowledge in this field. I am eager and determined to improve myself in this area with my willingness to learn and perseverance.

### STRENGTHS AND EXPERTISE

**Languages:** HTML, CSS, SASS, JavaScript, TypeScript

**Frameworks and Technologies:** React, Material UI, Tailwind CSS, Git, Vite, Bootstrap, Ant Design, CSS-in-JS libraries, Zustand, React Hook Form, NPM, PNPM, Visual Studio Code, GitHub, Postman

**Soft Skill:** Communication, Problem-Solving, Teamwork, Adaptability, Attention to Detail, Creativity, Leadership, Time Management

### PROJECTS

#### OJS Nutrition | [Live View](#)

**Technologies:** React, Vite, TypeScript, SCSS, React Router DOM, Zustand, Blaze Slider, Material UI

- I developed a comprehensive shopping application using React, Vite, React Router DOM, TypeScript, Material UI, Zustand, and Blaze Slider. The app is fully responsive, offering a seamless experience across mobile, tablet, and web.
- Dynamic Product Listing: Infinite Scroll dynamically loads products from the API.
- Address Management: Users can edit and manage addresses with Zustand.
- Product Detail Page: View product details, select options, and add to cart.

Future plans include backend integration for dynamic pricing, JWT-based session management, and user authentication.

#### Placeholder-React | [Code](#) | [Live View](#)

**Technologies:** React, TypeScript, SCSS, Bootstrap, Zustand, Styled Components

- I developed a customized Placeholder API clone using TypeScript, Bootstrap, and React-Router that displays content such as posts and albums specific to a particular user. Additionally, we allow users to like and save posts and albums to localStorage.

#### Shopping List | [Code](#) | [Live View](#)

**Technologies:** React, JavaScript, Bootstrap, Styled Components, CSS

- Implemented a dynamic Shopping List application using JavaScript, leveraging the power of array methods to efficiently filter items based on various categories, enhancing the user's ability to organize and manage their shopping needs.

#### Star Wars API | [Code](#) | [Live View](#)

**Technologies:** JavaScript, CSS, HTML

- Developed a dynamic Star Wars application using JavaScript, featuring a filter-by-homeworld functionality. This application enhances user experience by efficiently listing and filtering characters based on their homeworlds.

#### Responsive Web Design | [Code](#) | [Live View](#)

**Technologies:** HTML, Bootstrap, SCSS

- This project aims to translate the Figma design into code using HTML, Sass, and Bootstrap. It emphasizes that the design is visually appealing and suggests that the project isn't overly challenging, but assistance may be needed with certain technical details.

## WORK EXPERIENCE

### Turkcell Global Bilgi | Customer Representative

May 2021 – Present

For the past 3.5 years, I have been working as a Customer Service Representative, involved in both call center operations and written communications.

- Provided solution-oriented customer service.
- Managed call center operations.
- Handled written communications.
- Stayed updated with technological advancements.

### Yazaki Otomotiv | Production Personnel

Feb 2018 - Jul 2018

I worked in the automotive sector, where I participated in international projects and spent one year abroad. I gained the opportunity to develop innovative solutions and experience a global business environment.

## EDUCATION

### Anadolu University | Healthcare Management

Sep 2018 - Jul 2020

After completing my associate degree, I pursued a 2-year bachelor's completion program in healthcare management. During this period, I gained comprehensive knowledge in healthcare system management and successfully upgraded my education to a bachelor's level.

**Classes:** Global Health Policy, Operations Research, Healthcare Quality Improvement, Healthcare Ethics and Law, Health Economics, Healthcare Policies, Healthcare Systems Analysis

### OnlyJS Academy | Frontend Development Trainee

January 2023- Current

At OnlyJS Academy, I gained proficiency in **React.js**, **TypeScript**, **JavaScript**, **Bootstrap**, and **Material-UI**. I excel in building user-friendly and responsive interfaces using HTML, CSS, SASS, and CSS-in-JS. I streamline the development process with tools like Vite and NPM, while Zustand and React Hook Form enhance state and form management. I am skilled in developing dynamic and interactive web applications and ready to contribute to innovative projects.

**Classes:** HTML, CSS, Bootstrap, SASS, JavaScript, Vite, React, CSS-in-JS, Zustand, React Hook Form, NPM, TypeScript, Material-UI, Git, GitHub, Vercel, Cursor, Windsurf AI

## LANGUAGES

**Turkish** (Native), **English** (Limited working proficiency)
